

.....
SAKRETE CONCRETE & MORTAR DISSOLVER
.....

SAKRETE Concrete & Mortar Dissolver is a safe, environmentally-friendly, liquid alternative to aggressive acid concrete removers. SAKRETE Concrete & Mortar Dissolver can be used to remove cured cement, concrete, mortar or stucco from most surfaces.

FEATURES & BENEFITS

- Environmentally-friendly
- Non-fuming
- Non-corrosive
- Non-hazardous to equipment
- Easy to apply; just spray on

USES

For removing cured cement, concrete, mortar or stucco from most surfaces. Dissolves cement off tools, trowels, molds, concrete saws, patios, wooden decks, concrete splashed siding, glass, vehicles and more!

READ ALL DIRECTIONS BEFORE STARTING WORK.
ATTENTION: WEAR GLOVES, SAFETY GLASSES AND PROTECTIVE CLOTHING!

PROCEDURES

Surface Preparation: IMPORTANT: Never wet surface before applying this product. Completely saturate area of hardened concrete to be removed with undiluted SAKRETE Concrete & Mortar Dissolver. Surface will turn white on contact, then darken. Allow to penetrate for 10 to 15 minutes. Then, re-apply to same area. Keep surface wet with SAKRETE Concrete & Mortar Dissolver. Concrete will begin to soften and release from surface. Total time required is approximately 20 to 30 minutes.

If SAKRETE Concrete & Mortar Dissolver evaporates, a white residue will appear. DO NOT RINSE! Re-apply SAKRETE Concrete & Mortar Dissolver to reactivate as needed until concrete has softened to a mush. On extra thick build-up, repeat cleaning directions until build-up has softened.

NOTE: Multiple applications used in conjunction with mechanical means may be necessary for removing stubborn or thick, built-up areas. Rinse with cold water with a garden hose and pressure nozzle, or use a high-pressure washer.

PACKAGING

651 mL (22 oz) bottle

UPC

050605182229

STORAGE

Store in a tightly closed container, off the floor, in a dry place. Keep from freezing.

SAFETY PROCEDURES

Wear protective clothing and equipment.

FIRST AID:

EYES: All exposures are considered severe. Flush thoroughly in an eye wash for 15 minutes. Get medical attention immediately.

SKIN: Wash for 5 minutes.

INHALATION: If excessive inhalation has occurred, initiate oxygen administration at a 2 L to 6 L per minute flow. Get medical attention immediately.

INGESTION: Do not induce vomiting. Conscious patient, give orally, high amounts of water or milk. Obtain medical attention immediately.

For emergency information call CHEMTREC at 800-424-9300.
