

POWDER RELEASE AGENT

BEIGE

CHARCOAL

GREY

LIGHT GREY

WALNUT

*All samples above were stamped onto Snow Colour Hardener and sealed with a solvent based acrylic. Unsealed release is very chalky looking and will not resemble the finished product (especially Walnut). To view the colour contained within the release, smudge some powder over a white piece of paper.

WARRANTY/DISCLAIMER

Because the conditions of use and application of our products are beyond our control, Vieira Concrete Supplies makes no warranty of fitness or merchantability for any particular purpose and expressly disclaims liability for incidental or consequential damages whether based on negligence or warranty. Buyer's sole remedy shall be the refund of Colour purchase price from point of purchase.

To obtain the best results use low water to cement ratio (less than 4" slump). Higher water to cement ratio will result in washed out colour. DO NOT vary water to cement ratio when using colour. DO NOT use chloride admixtures. DO NOT add water to surface or tools while finishing. Always seal coloured concrete surfaces. Colour selections on this chart are approximated as closely as possible to the appearance of colour when used on horizontal troweled and/or imprinted surfaces. Variations can be expected due to job conditions, cement finishing techniques, use of sealers and slight raw material colour drifts. Due to the natural source materials in cement and handcrafted nature of imprinted concrete, variations are acceptable and desirable.
