

CITRAMAX

HEAVY DUTY INDUSTRIAL DEGREASER CONCENTRATE

GENERAL DESCRIPTION

Super-concentrated natural citrus-based industrial degreaser. Emulsifies petroleum/vegetable oils, animal fats and water based soils. Ideal for cleaning heavily soiled concrete floors. Dilutable in hot or cold water.

AREAS OF APPLICATION

Effective against grease, oil, carbon soils (soot), light tar/adhesive and general particulate soils. Suitable for use on hard surfaces such as shop and plant floors, walls, equipment, engines, transmissions, and tools.

SPECIAL FEATURES

Quick, Simple and Effective To Use - provides excellent cleaning action on a wide range of water or oil based soils. Effective in hot or cold and hard or soft water. Powerful blend of surfactants, sequestrant and penetrants efficiently breaks through the toughest soil conditions.

Fast Acting - Contains unique penetrant/surfactant blend which quickly lifts dirt from the tiniest crevices and emulsifies grease, oils and animal fats for easy removal.

Safe On Water Safe Surfaces - non-fuming, non-flammable, not harmful to any surface not harmed by water alone when used as directed. Totally free rinsing - leaves no film or harmful residues when rinsed properly with clean water.

Versatile Use Methods - apply via high or low pressure spray equipment, trigger sprayer, cloth, sponge, brush or mop. Allow sufficient surface contact time, then wipe off or rinse thoroughly with clean water.

Economical - one product can be used for multitude of applications (simply adjust dilutions to match application). Reduces staff training, documentation and storage requirements. Free rinsing properties shortens removal time and therefore lowers labour costs.

USE DIRECTIONS

Dilute with cold, warm or hot water (dilution levels will depend on the type and condition of soil, and the method of cleaning to be used). A general guide is provided below for your reference.

SOIL CONDITION	DILUTION	
	mL/litre	oz/gallon
LIGHT CLEANING	up to 13	up to 2
MEDIUM CLEANING/DEGREASING	up to 25	up to 4
HEAVY DEGREASING	up to 100	up to 16

DEGREASING FLOORS, EQUIPMENT, ENGINES, TRANSMISSIONS, TOOLS: Apply appropriate CITRAMAX solution via spray, wipe, mop or brush. Allow adequate contact time. Scrub as necessary. Wipe off with damp cloth or flush rinse with clean water.

NOTE: Dilute only with potable water for use in food processing plants. When used on surfaces subject to direct food contact, adequately rinse with potable water following product use.

PHYSICAL PROPERTIES - LIQUID

CITRAMAX is a citrus based solvent uniquely formulated with a blend of concentrated alkaline cleaners, sequestrants and surfactants.

Type	Cleaner/Degreaser
Appearance	Clear Orange Liquid
Odour.....	Orange
Viscosity (cps)	< 20
Flammability	Non-Flammable
pH (concentrate)	13 (+/- 0.5)
Specific Gravity.....	1.02
Solubility in Water.....	100%
Toxicity (concentrate).....	Serious Eye/Skin Damage Avoid Ingestion

FOR USE IN INDUSTRIAL, INSTITUTIONAL, MARINE, COMMERCIAL and FOOD PROCESSING ENVIRONMENTS

PACKAGING

210 L Drum; 20 L Pail; Case (4x4L)
